

Package ‘jumble’

May 8, 2026

Title A Discrete Colour Palette

Version 0.1.1

Description A discrete colour palette. These colours make it easier to create relatively accessible and colour-blind safe visualisation.

Contents

grey	2
jumble	2
navy	3
orange	3
pink	4
red	4
slate	5
teal	5

Index**6**

grey	<i>grey colour</i>
------	--------------------

Description

grey colour

Usage

grey

Format

An object of class character of length 1.

Examples

```
scales::show_col(jumble::grey)
```

jumble	<i>A discrete colour palette</i>
--------	----------------------------------

Description

A pretty discrete colour palette that is relatively accessible.

Note only the first 3 colours are safe for all forms of colourblindness, as well as greyscale.

An extra safe colour that works is `jumble::grey` i.e. `jumble::jumble[c(1:4, 7)]`.

Usage

jumble

Value

A character vector.

Examples

```
scales::show_col(jumble::jumble)
```

navy

Navy colour

Description

Navy colour

Usage

navy

Format

An object of class character of length 1.

Examples

```
scales::show_col(jumble::navy)
```

orange

Orange colour

Description

Orange colour

Usage

orange

Format

An object of class character of length 1.

Examples

```
scales::show_col(jumble::orange)
```

pink

Pink colour

Description

Pink colour

Usage

pink

Format

An object of class character of length 1.

Examples

```
scales::show_col(jumble::pink)
```

red

Red colour

Description

Red colour

Usage

red

Format

An object of class character of length 1.

Examples

```
scales::show_col(jumble::red)
```

slate	<i>Slate colour</i>
-------	---------------------

Description

Slate colour

Usage

slate

Format

An object of class character of length 1.

Examples

```
scales::show_col(jumble::slate)
```

teal	<i>Teal colour</i>
------	--------------------

Description

Teal colour

Usage

teal

Format

An object of class character of length 1.

Examples

```
scales::show_col(jumble::teal)
```
